

# 1000 Island Playhouse

# Case Study

In 1982, the Gananoque Canoe Club was purchased and converted into a 360-seat theatre. Located directly on the banks of the St. Lawrence River in Gananoque, Ontario, the Thousand Islands Playhouse produces a broad repertoire of both classic and contemporary plays including Canadian and international works. As host of one of the top-five summer festivals in Ontario, the Thousand Islands Playhouse strives to enrich and contribute to the community in which they work as well as the Canadian theatre community as a whole.

The playhouse encountered a Central Processing Unit fault on their existing Chubb Edward's conventional QuickStart system which required an entire system replacement. The new addressable system included Maple Armor's FW106 panel which was installed to recess into the wall to maximize its subtlety. FW511 smoke detectors, the FW721 manual stations, as well as the FW851 isolator module.

Given the user-friendliness of Maple Armor's systems, the replacement was completed within one day by three technicians without any delays or difficulties.

With almost 50,000 attending guests every year, we are so pleased to be the Thousand Island Playhouse's first choice in fire safety.

## About Maple Armor

Founded in Montreal, QC in 2011, Maple Armor provides addressable fire alarm systems. We're excited to provide high quality and cost effective options, with the reliability of Canadian engineering. We work closely with our clients to develop our products because we know how important it is to meet their individual needs. We're very proud that the work we do protects lives every day, and that passion for our industry is what drives us to maintain the highest level of quality and reliability.
