

## General Truck Center

# Case Study

The award-winning General Truck Center in Mathuen, Massachusetts, has been selling and repairing commercial trucks for its customers since 1924. Dedicated to taking care of their customers and doing right by them, their knowledgeable and helpful team of ASE certified technicians specialize in Isuzu and Hino trucks.

When their existing four zone conventional panel died, they contacted the team at ECI Systems for their replacement. As a lot of their equipment was antiquated and needed upgrading, the benefits of an addressable system were detailed, and a Maple Armor system proved to be the ideal solution!

Their new system includes Maple Armor's FW106 control panel, the FW511 smoke detector, the FW521 heat detector, and the FW721 manual station. To save the client money, the existing notification circuits remained intact. The system also features Maple Armor's FW811M mini input module.

We've received some tremendous feedback from our partners at ECI Systems whose professionalism and expertise were on full display. With two technicians on site, this installation went incredibly smoothly, taking a mere six hours to complete start to finish.

## About Maple Armor

Founded in Montreal, QC in 2011, Maple Armor provides addressable fire alarm systems. We're excited to provide high quality and cost effective options, with the reliability of Canadian engineering.

We work closely with our clients to develop our products because we know how important it is to meet their individual needs.

We're very proud that the work we do protects lives every day, and that passion for our industry is what drives us to maintain the highest level of quality and reliability.
