

Lizzy Bay Homes

Case Study

Lizzy Bay is a collection of townhomes located in the heart of downtown Squamish. With its unlimited access to nature, the homes are also mere steps away from markets; stores; public libraries; as well as elementary and high schools. With one to four bedroom options, the homes come with spacious rooftop patios perfect for entertaining and unwinding after a long day.

This new-build project was won thanks to the strong existing relationship our partners at Phoenix Fire had with the electrical contractors who had had an opportunity to work with our products in the past. Having seen and experienced our cost-effective and user-friendly products first-hand before, the solution for this project was quite clear!

The fire alarm systems at Lizzy Bay now feature Maple's Armor FW106S Single Loop compact panels; the FW123 annunciator; the FW511 smoke detectors; FW521 heat detectors; the FW721 manual stations; the FW962 horn/strobes; and the FW971 horns. The system also required the FW811 Input module and the FW851 Isolator Module.

We have gotten awesome feedback from all parties involved in this installation. We've heard from the developer who is ecstatic with the finished product and from the electrician who was pleased with how easy the system was to install.

About Maple Armor

Founded in Montreal, QC in 2011, Maple Armor designs and manufactures addressable fire alarm systems. We're excited to provide high quality and cost effective options, with the reliability of Canadian engineering.

We work closely with our clients to develop our products because we know how important it is to meet their individual needs.

We're very proud that the work we do protects lives every day, and that passion for our industry is what drives us to maintain the highest level of quality and reliability.
