

Notre-Dame-d'Etchemin

Case Study

Located in Saint-Romuald, QC, the Notre-Dame-D'Etchemin school and its faculty is known for its professionalism, dynamism, and innovation. The school prides itself in providing a fascinating environment that stimulates their students' desire to learn and encourages them to continuously better themselves. Their educational mission is to prepare their students to become the responsible and autonomous citizens of tomorrow.

When the Notre-Dame-D'Etchemin school of the Navigator School Board needed to replace their defective control panel, they trusted Maple Armor's products and Safety First's expertise to get the job done.

The school's defective control panel was replaced with Maple Armor's FW106 intelligent addressable control panel. Furthermore, manual stations, heat detectors, smoke detectors, horns, and horn/strobes were also installed. This installation was completed in 12 hours without any delays or complications.

We have received such amazing feedback not only from the Notre-Dame-D'Etchemin school but also from the Navigator School board. We very much look forward to working closely with the Navigator School Board and Safety First for their upcoming projects. In providing cost-effective and reliable options, we trust that Maple Armor will be their primary choice for intelligent fire alarm systems henceforth.

About Maple Armor

Founded in Montreal, QC in 2011, Maple Armor provides addressable fire alarm systems. We're excited to provide high quality and cost effective options, with the reliability of Canadian engineering.

We work closely with our clients to develop our products because we know how important it is to meet their individual needs.

We're very proud that the work we do protects lives every day, and that passion for our industry is what drives us to maintain the highest level of quality and reliability.
