

Ocean Sales Group

Case Study

Founded in 1983 and headquartered in Calgary, Alberta, Ocean Sales sells its quality and innovative house products through live demonstrations at leading consumer shows and fairs across the country. Having also started to sell their products online, they are still dedicated to providing their customers with the information they need to confidently make informed buying decision and to offering product satisfaction with enthusiasm, pride, and company spirit.

It became apparent during the Ocean Sales headquarters' annual inspection that the existing fire alarm system would need to be replaced. Ultimately, the fire alarm system encountered hardware failure a few months later and our partners at Kantra Electric were tasked with installing the replacement system.

Thanks to the cost-effective and readily available products, Maple Armor proved to be the ideal solution for this system replacement. The new system now includes Maple Armor's FW106S compact single-loop panel; the FW511 smoke detectors; the FW521 heat detectors; the FW721 manual stations; the FW962 horn/strobes; and the FW971 horns.

The system also required the FW812 dual-input module.

We've received some really awesome feedback from the Management team at Ocean Sales who were super happy with their new system. They were truly impressed with the availability of the product and the speed with which they were serviced.

Hats off to the team at Kantra Electric for a job well done!

About Maple Armor

Founded in Montreal, QC in 2011, Maple Armor provides addressable fire alarm systems. We're excited to provide high quality and cost effective options, with the reliability of Canadian engineering. We work closely with our clients to develop our products because we know how important it is to meet their individual needs. We're very proud that the work we do protects lives every day, and that passion for our industry is what drives us to maintain the highest level of quality and reliability.
